

PROFESSIONAL SUMMARY

Software engineer with production experience shipping healthcare products across Angular and C#/.NET at Presage Care, alongside an independent full-stack and mobile AI companion built with Python, FastAPI, and native Android Kotlin. Delivered 88 merged production pull requests across three enterprise repositories, bridging clinical user workflows, backend services, and native device lifecycles.

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, Angular, RxJS, C#, ASP.NET Core, Python, FastAPI, Kotlin (Android).

Databases & Tools: SQL Server, EF Core, Azure DevOps, Git, Bryntum Calendar, Capacitor.

Languages: Chinese (Native), English (B2), French (B1).

PROFESSIONAL EXPERIENCE

Presage Care — Software Engineer (Internship) Feb 2026 – Aug 2026 | Paris, France (PariSanté Campus)

Regulated digital healthcare platform delivering clinical monitoring and scheduling software to care institutions across France.

- **Multi-Patient Scheduling:** Clinical coordinators experienced race conditions and state desynchronization when rapidly switching between high-density patient schedules. Owned the calendar state architecture in Angular and RxJS, implementing request-sequencing tokens to discard out-of-order network responses, a sliding-window date cache, and explicit store disposal to prevent memory accumulation.
- **Weekly Clinical Reporting:** Facility directors needed interactive report previews that matched scheduled outbound emails without layout or data drift. Modernized the reporting architecture by replacing client-side email HTML scraping with strongly-typed backend JSON contracts in ASP.NET Core and Angular, decoupling interactive previews from email delivery.
- **Enterprise Production Delivery & CI:** Shipped 88 merged production pull requests across three enterprise repositories (institute portal, patient web app, core backend). Authored automated CI quality gates to validate bilingual translation keys across UI templates and enforce work-item traceability across regulated releases.

SYSTEMS & PRODUCT PROJECTS

Resonova — AI Audio Companion Mar 2026 – Present

Independent cross-platform AI audio companion spanning Python/FastAPI backend, TypeScript/Capacitor container, and native Android Kotlin.

- **Android Background Playback:** Mobile OS background execution policies throttle hybrid web containers when screens turn off, interrupting user audio sessions. Moved playback authority into a native Android Kotlin foreground service with system media controls, maintaining playback state synchronized with the Python/FastAPI backend under Android lifecycle and Doze constraints.
- **Adaptive Content Sequencing:** Designed a behavior-aware four-level explore/lock sequencing engine in Python that modulates track selection using real-time skips and listening history; verified sub-150ms decision latency across a test suite of 5,000+ interaction events.
- **AI Script Generation Reliability:** Integrated Gemini foundation models into automated script generation using strict JSON response schemas and typed degradation paths for truncated responses, preventing unhandled server crashes during background synthesis.

Dashcam Video Integrity Validator Jan 2026 – Apr 2026

Algorithmic verification service matching video telemetry against perceptual hash timelines in C#/.NET.

- **Fleet Video Integrity Verification:** Built an algorithmic verification service in C#/.NET comparing submitted video frames against a reference perceptual-hash timeline, detecting timestamp drift and missing video spans (>5,000ms) while remaining resilient against re-encoding.

EDUCATION

ESIGELEC Sep 2024 – Sep 2026 | Rouen, France

Master of Science in Software Engineering & Digital Transformation

Coursework completed, internship defense completed on 2026-09-18; degree conferral pending formal academic validation. GPA: 16.45/20 (Rank: 2/16). Awarded Youth Achievement Merit Scholarship.

Hainan Vocational University of Science and Technology Sep 2020 – Jun 2024 | Haikou, China

Bachelor of Science in Software Engineering

GPA: 3.7/4.0 (Rank: 20/443).
